Roof: hollow polycarbonate 1850 x 1260 x 4 mm

Roof slope: 8°

Supporting beams: 60 x 60 x 3 mm

Filling: welded mesh 50 x 50 x 3 mm

Filling beams: 40 x 20 x 2 mm

Feet: 60 x 180 x 5 mm

Weight:

Surface treatment: galvanized zinc

Suitable use: outdoor areas

PRODUCT DESCRIPTION:

A small (container) shelter is a practical and aesthetically pleasing solution for protecting containers from adverse weather and unwanted surrounding contamination. It provides an organized and hygienic arrangement of space for containers, thereby contributing to the clean appearance of the surroundings of apartment buildings, company premises, schools, or other public spaces. Thanks to its sturdy construction and quality materials, it offers long durability and minimal maintenance requirements.

USE:

The steel container shelter is used for protecting, organizing, and maintaining the cleanliness of container areas.
