Big steel (container) shelter – PKV

PROPERTIES:

Material: steel

Width: 1720 mm

Depth: 1620 mm

Height: 2400 mm

Interior dimensions: 1600 x 1500 x 2250 mm

Roof: hollow polycarbonate 1720 x 1900 x 4 mm

Roof slope: 5°

Supporting beams: 60 x 60 x 3 mm

Filling: welded mesh 50 x 50x 3 mm

Filling beams: 40 x 20 x 2 mm

Feet: 60 x 180 x 5 mm

Weight:

Surface treatment: galvanized zinc

Suitable use: outdoor areas

PRODUCT DESCRIPTION:

A large (container) shelter is a practical and aesthetic solution for protecting containers from adverse weather and unwanted pollution of the surroundings. It provides a clear and hygienic arrangement of space for containers, thereby contributing to a clean appearance around apartment buildings, company premises, schools, or other public spaces. Thanks to its sturdy construction and quality materials, it offers long durability and minimal maintenance requirements.

USE:

The steel container shelter is used for protecting, organizing, and maintaining the cleanliness of container areas.
